

## ATR AIR MAKEUP UNITS

Designed for optimal fuel efficiency, the Col-Met ATR EZ Heat and Cure air makeup unit delivers conditioned and filtered heated air evenly throughout your booth. Precision-controlled to minimize temperature variations, our air makeup unit effectively removes particulates from the air that can negatively affect the quality of your finish.

By utilizing 1.5 to 4 million BTU burners, our motorized auto gas control delivers a consistent burn for an evenly heated airflow into the booth. With self-adjusting profile and inlet dampers, the EZ Heat and Cure modulates airflow as it passes over the burners, regulating air pressure and fuel consumption for a clean, fuel-efficient burn. Our air makeup units have exclusive features for safer operations and enhanced operator comfort. Fuel-efficient and designed for better finishing, experience a level of quality and control you can only expect from Col-Met.

### **BETTER RESULTS WITH ATR EZ HEAT AND CURE:**

- CAPABLE OF SAVING UP TO 40% IN ENERGY COSTS
