

FG ELITE SERIES AUTOMOTIVE REFINISHING BOOTH

EXCEPTIONAL PERFORMANCE. A HIGH-QUALITY FINISH. STANDARDS YOU CAN ONLY GET FROM COL-MET.

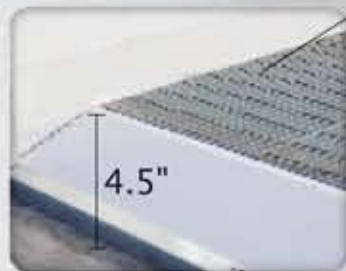

HINGED FILTER RACK

Equipped with an easy-to-change filter rack, the ATR FG booth comes supplied with one set of UL-rated, Class 2 filters for both the intake and exhaust racks.

LIGHTS

Full-booth illumination is supplied from twelve UL-listed, four-tube, 48" long, 32-watt fluorescent light fixtures. **(optional)** Inside access light fixtures available.

MINI-PIT (OPTIONAL)

Exclusive only to Col-Met, our 4.5" high mini-pit arrives pre-balanced with the air makeup unit for optimal finishing conditions.

All balancing plate configurations are done prior to shipping, allowing for faster and accurate installation. The ATR mini-pit can also be retrofitted to fit any booth configuration.

INTAKE PLENUM

Fabricated from 18-gauge galvanized, powder-coated steel. Insulated intake plenum **(optional)** is available to help reduce heat loss.

AIR MAKEUP UNIT

EZ Heat and Cure air makeup unit supplies conditioned and filtered air evenly throughout the booth. Capable of saving up to 40% in energy costs, our air makeup unit delivers enhanced fuel efficiency while effectively removing particulates from the air stream.

CONTROL PANEL

UL-listed digital power and control panel manages air makeup unit, exhaust fan, lighting, variable frequency drive (VFD), and **(optional)** energy-saver modes.

DOUBLE-WALL FRONTAL

Frontal walls are constructed of double-sided, 20-gauge, premium quality galvanized steel, with 2" of insulation and powder-coated white on both sides.

Pictured is an FG Elite Series drive-through booth including all available options. Col-Met booths are provided complete with all necessary hardware and certified by ETL to meet applicable national requirements established by OSHA and NFPA for paint booth construction.
